PROFESSIONAL SUMMARY

I am a Computer Science Engineering student with a strong foundation in web development, databases, and emerging technologies. I am passionate about solving real-world problems by building efficient and scalable software solutions. Through my internship experience, I have developed impactful web applications and collaborated effectively with cross-functional teams to deliver practical, high-quality results.

SKILLS

- Full-Stack Web Development – Building scalable, end-to-end web applications using React, HTML, CSS and JavaScript
- LLM Applications & Prompt Engineering – Designing AI-driven solutions and optimizing prompts for performance
- Firebase Development – Firestore database, Authentication, and Google OAuth integration
- Web Design – Prototyping and UI creation using Stitch
- AI Tools Proficiency – Experienced with Claude, Gemini, GPT, and Perplexity AI
- Version Control – Git and GitHub
- Python, Java(OOPs), SQL
- Exploring Linux and Cloud Computing

EXPERIENCE

January 2026, Pune, India (**GDGC Hackathon First Prize**)

SysAutopsy – AI-Based System Diagnostics Web Application

- Designed and developed an AI-based web application (sysautopsy.orender.com) to automate system log analysis and identify root causes of failures.
- Built a secure backend with user authentication and controlled access to the diagnostics platform.
- Implemented backend workflows for log upload, parsing, and structured log processing.
- Developed intelligent analysis logic to detect errors, classify system issues, and generate human-readable diagnostic reports.
- Deployed the application to a production environment and addressed real-world challenges related to development, performance, and reliability.
- Gained hands-on experience in full-stack web development, backend architecture, production deployment, and AI-assisted system analysis.

EDUCATION

Bachelor of Technology (B.Tech)
D Y Patil International University, Akurdi, Pune
Expected in May 2028

HSC
Maharashtra State Board
Pune, India
January 2024

Higher Secondary Education
Podar International School, ICSE, India

CERTIFICATIONS

- Programming with Python 3.X
- SQL and Relational Databases
- Java Course – Mastering the Fundamentals
- AWS Educate Introduction to Generative AI

ACHIEVEMENTS

- **Academic Excellence Scholarship, DYPIU-2026**
  Awarded for exemplary academic performance in the first year of BTech. Computer Science Engineering
- **Winner - GDGC WowVerse 2026 Hackathon, DYPIU**
  Secured 1st place among teams by developing SysAutopsy: A Digital Black Box .

November 2025, Pune, India
Nirgun Washers and Dry Cleaners - Laundry Shop Website & Service Management System

- Designed and developed the official website (nirgunwashers.in) to enhance the digital presence and customer reach of a local laundry business.
- Built a backend-enabled service management system allowing dynamic pricing and management of laundry services (add, edit, and remove).
- Implemented a clean, responsive, and user-friendly UI for customers to view services and pricing in real time.
- Enabled price and service updates without code changes, allowing the shop owner to manage offerings independently.
- Gained experience in developing and deploying a real-world business web application.
- A Laundry Shop

May 2025 - July 2025, Pune, Maharashtra
Summer Intern, Poona Panjarpol Trust

- Contributed to a non-profit organization dedicated to animal welfare by enhancing its digital presence and operational efficiency.
- Designed and developed the official website (poonapanjarpoltrust.org) to improve outreach and accessibility.
- Built a Cattle Health Record Management System to maintain structured records of animal health and treatments.
- Worked closely with the trust team to understand on-ground challenges and deliver practical, web-based solutions.
- Gained hands-on experience in web development, basic database design, and real-world application deployment.
- Non-profit organization dedicated to animal welfare

February 2026
Tech Lead, Tech For Need, DYPIU

- Developed an **Automated Certification System (https://tfn-certificate-system.vercel.app/)** for bulk certificate generation and secure distribution, reducing manual effort
- Built a **QR-based Digital Check-in System (https://tfn-checkin.vercel.app/)** enabling real-time participant verification and streamlined event entry
- Contributing to the **official TFN website (https://tfn-website-nine.vercel.app/)** (under development), focusing on responsive UI and scalable frontend architecture.
